Northumbria University: Science, Technology, Engineering and Mathematics (NU:STEM) Lectures

NUSTEM evening lectures are back and have started.

These lectures cover a range of topics for students who may be interested in studying a STEM subject at University. You can find out more about the lectures [here](#).

Lecture 2:
**Talking in Light: Satellite
Laser Communication**
by Mansour Abadi

A satellite often can send huge amount of data to another satellite or a ground station. Nowadays, satellites use radio frequency (RF) for data transmission, which is slow, and distance limited. In this lecture, we will talk about how here at Northumbria, we are trying to use a laser beam instead of RF to overcome the current communication limits.
